CORAL CellEnergy H2: Essential Calcium – Plus 73 Other Minerals ~ EcoSafe Coral!

  Recommend this on Google

Women tend to need to take calcium supplements. I know I have taken one for years for bone health & for overall health. But I no longer take just a calcium supplement. I take Coral CellEnergy H2. It contains calcium but also 73 other minerals that the human body needs! Coral LLC provides all-natural minerals derived from coral in hundreds of health food stores and health food chains across the country, and the world. They are one of the very first above sea coral calcium company to use environmentally friendly harvesting practices of fossilized ocean coral. This is important not to disturb the under the water coral habitats.

Coral minerals are unlike any manmade food supplements available. Get it from the source, not from the lab, I say! Fossilized stony coral minerals were once immersed in seawater for thousands of years and over time they were raised above the sea. Coral has retained mineral properties of all 74 important seawater minerals. So cool right!

These minerals are very similar to the mineral composition of the human

body. The near perfect match and resulting benefits of coral minerals for human consumption are unbeatable and cannot be duplicated in a laboratory. oral CellEnergy H2 capsules are a groundbreaking new supplement for adding the benefit of high-dose active Molecular Hydrogen (H2) plus 74 bio-available coral minerals. As the capsule reacts, millions of tiny hydrogen bubbles infuse and saturate the body's cells. Excellent!

Molecular Hydrogen (H2) generates an electron- rich potential (-ORP). You can measure it! This rare property is uniquely found in fresh, raw living foods and juices, mother's milk and many of the world's healing waters.

Molecular hydrogen (H2) – the smallest and most mobile molecule – has fast gained significant scientific and medical attention as the subject of hundreds of recently published articles corroborating its enormous impact on therapeutic and preventive medicine. Offering the greatest bioavailability of any nutrient, its small size allows it to deeply penetrate cells to eliminate free radicals at the source. And now Corall LLC offers it to you in capsule or powder form!

According to the [Molecular Hydrogen Foundation](#), about 150 different disease models have been studied in which molecular hydrogen appears to exert a beneficial effect. These include cardiovascular disease, Parkinson's disease, Alzheimer's disease, dementia, diabetes, osteoporosis, chronic inflammation, hypertension, hyperlipidemia and many more. Additionally, many health-minded people have reported more energy, better focus, improved physical performance and faster recovery as a result of H2 intake.
