FOR IMMEDIATE RELEASE-draft

Coral LLC® Releases CellEnergy H2 to Consumers

Revolutionary new molecular hydrogen supplement now available to the U.S. market

CARSON CITY, NV (November XX, 2015) – [Coral LLC Coral CellEnergy H2](#), a revolutionary supplement that brings users access to the buzzed-about benefits of molecular hydrogen, plus 74 bio-available coral minerals, is now available.

For the first time ever, Coral CellEnergy H2 delivers U.S. consumers a supplement that harnesses the power of molecular hydrogen (H₂) – the smallest and most mobile molecule fast gaining significant scientific and medical attention for its enormous impact on therapeutic and preventive medicine.

The subject of hundreds of recently published articles corroborating its significance, molecular hydrogen offers the greatest bioavailability of any nutrient, as its small size allows it to deeply penetrate cells to eliminate free radicals at the source. According to the [Molecular Hydrogen Foundation](#), about **150 different disease models have been studied in which it appears to exert a beneficial effect**, including cardiovascular disease, Parkinson’s disease, Alzheimer’s disease, dementia, diabetes, osteoporosis, chronic inflammation, hypertension, hyperlipidemia and many more.

Additionally, many health-minded people have reported more energy, better focus, improved physical performance and faster recovery as a result of H₂ intake.

Coral CellEnergy H2 **combines the remarkable properties of molecular hydrogen with essential bioavailable calcium – plus 73 other minerals** – all harvested from above-sea, EcoSafe™ coral.

“We are honored to be the first company to bring to the U.S. this ground-breaking product offering vast preventative and therapeutic potential,” said Jason DeWitt, managing partner of Coral LLC. “It’s exciting to be able to introduce our customers to a supplement that is at the forefront of scientific research and will likely have a huge impact on modern medicine in the future.”

Coral CellEnergy H2 is now available in a two-month supply (60 caplets) for \$59.99 (MSRP).

Visit www.coralcalcium.com to purchase or locate a nearby retailer.

To be considered for first available samples of Coral CellEnergy H2, media may contact Stacey at On the Horizon Communications at (805) 773-1000, or email stacey@thepressroom.com.

Coral LLC, the leading brand of coral minerals, is the original coral calcium mineral company in the U.S., using only EcoSafe™ above-sea coral in its products. The company is located at 5576 Bighorn Drive, Carson City, NV.
